

Clark Forklift Part

Clark Forklift Parts - Performing worldwide, there are now 350,000 Clark forklifts and lift trucks in operation, with more than 250,000 of those in service in North America. Clark has five major lines of forklifts across the globe, making it one of the most expansive corporations in the industry. Heavy duty trucks ranging from 1,500lb to 18,000lb capacities, dual fuel, gasoline, LPG, hand-driven lift trucks, narrow-aisle stackers and electric riders are some of their specialties.

Clark Totalift has 20 distinctive brands of forklifts, with components covering more than 120,000 specialized items for all of its automated equipment. Your regional Clark Supplier is your total source for availability of all your components requirements offered by Clark Totalift.

Clark has a extraordinary Parts Supply team. The parts warehouses are conveniently situated in Changwon, South Korea and Louisville, Kentucky to guarantee exceptional service to both their buyers and their sellers. For over 90 years, Clark has exceeded industry standards, being one of the most actively advancing companies. Motivated to offer the highest level of value and service to our customers, Clark remains on the leading edge when it comes to improving output and benefiting performance.

Worldwide, Clark has one of the most outstanding supplier support networks. With over 550 locations globally, supplier representation in over 80 countries and 230 locations in North America, their high level of commitment to their customers predominates the materials handling market.

Clark proudly remains an innovative leader of the industrial equipment industry, pioneering safety features such as the worker restraint system. This exceptional dedication to safety is currently a customary feature on every lift truck.

Clark has a continual goal to have the No. 1 quality system in the industry which is demonstrated by their commitment to ISO standards. Clark, is the first manufacturer of forklifts and lift vehicles to be globally certified with quality standard ISO 9001 in all of its manufacturing facilities. Furthermore, the ISO 14001 Environmental Management System certificate was awarded to Clark's Korean facility in 2001. This paramount achievement enables Clark to be prepared for any number of environmental restrictions, thus placing them in a dominant industry position.

Clark has selected the system of "Lean Production" at all of its assembly plants because this technique is extremely economical and permits minimal use of resources. Developed to ensure maximum efficiency, this system is intended to discover and acknowledge the most efficient methods for manufacturing plant stewardship. Clark has concluded this transition of its Korean facility. COPS which is Clark Optimized Production System, equally focuses on quality of product and services and production efficiencies.

Clark's product engineers and suppliers communicate together to develop the proficiency and brilliance of their products while minimizing costs. The new value engineering program combines innovative product development and offers superior consumer support and service within the industry.
